

Low-, Medium- and High-T Geothermochronology of Tectonic Processes

Conveners: Durmuş Boztuğ, Muharrem Satır, Matthew T. Heizler & Raymond Jonckheere

All the studies regarding the quantifying of the geological and tectonic evolution of the tectonic processes occurred in a wide range in the crust from lower- through middle- to shallow-crustal depths related to crystallization, cooling and exhumation history of the igneous and metamorphic rocks are kindly invited for oral or poster presentation
